

THOUSANDS OF OUR BELOVED  
SENIOR CITIZENS ARE BEING  
SLAUGHTERED EVERY MONTH.

They've survived world wars, the gold rush and the industrial revolution. Yet now some members of the United States Congress are these ancient forests' most deadly threat. More specifically, the politicians who are opposed to The Act To Save America's Forests. A bill that would prevent the U.S. Forest Service and timber corporations from cutting down the last 5% of America's ancient forests. Don't just get outraged at what these Politicians are doing, help us stop them. With your calls and support.

**Save America's Forests**
